

Sediment Filter Cartridge

Rainfresh CF3 sediment filter cartridge is specifically designed for general household applications where coarse filtration of sediment and particulate matter (dirt, rust, algae etc.) is required.

The CF3 filter cartridge is manufactured using a unique bead technology that results in a highly economical filter with excellent flow characteristics.

CF3 can be used as an excellent pre-filter to fine pore filter cartridges (5 μ or 1 μ) to enhance their life by removing the coarse particulates.

FEATURES

- Made up of premium grade polystyrene beads with polyethylene gaskets
- Effective in reduction of particles at rated micron size (30 micron nominal).
- Rigid construction - resistant to media migration
- **UNIVERSAL FIT** – Fits Rainfresh and most standard 10” filter housings

BENEFITS

- **Efficient sediment removal (30 μ) over long life**
- **Economical**
- **Low differential pressure**
- **Excellent filtration characteristics**
- **Universal Fit - Fits most standard 10” filter housings**

SPECIFICATIONS

Model*	Micron Rating	Length (Inch)	O.D (Inch)	I.D (Inch)	Gasket	Operating Temp	Max Flow Rate	Clean pressure Drop @ 60 psi feed @ max flow
CF3	30 μ nominal	9.75”	2.65”	1”	Yes	4 - 38 °C (39 - 100 °F)	8 US GPM	< 5 psi

NOTE – For use with water only.

WARNING: Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system.

TESTING & CERTIFICATION

Component certified to NSF/ANSI 61 and CSA B483.1 for material requirements only. Certification does not extend for use with competitive housings.
